DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 2, 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, lines 3-4, it is unclear as to what the language “or organophilic form modified by ion exchange” is modifying or referring to.

In claim 2, line 4, “wollastonite” has been misspelled.

Claims 7 and 8 do not have express antecedent basis for non-diene graft bases.

Claim Rejections - 35 USC § 103

2. Claims 1, 2, 4, 7-9, 11, 12, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 5,756,576 (Bruls et al) in combination with U.S. 5,484,838 (Helms et al) as per reasons of record.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

Art Unit: 1711

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 2, 4, 7-9, 11, 12, 15 and 16 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of copending Application No. 10/737,321 and 10/796,525. Although the conflicting claims are not identical, they are not patentably distinct from each other because they contain overlapping subject matter.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Amendment

5. Applicant's amendments filed October 11, 2006 have effectively overcome art rejection over Park et al reference.

Response to Arguments

6. Applicant's arguments filed October 11, 2006 have been fully considered but they are not persuasive with respect to rejection based on Bruls et al.

It is maintained that it is within the sphere of obviousness to one having ordinary skill in the art to employ an electrically conductive component in the compositions of Bruls et al (as per column 5, lines 18-22). Bruls et al specifically disclose conductive fibers and carbon fibers, reading on the presently claimed graphite and carbon nanofibrils. As to the alternative use of carbon black as the electrically conductive component, reliance is made on Helms et al's use of electrically conductive carbon black in polymer blends comprising a crystalline polymer, e.g., polyamide, and an amorphous polymer, e.g., impact modifiers. It is maintained that Bruls et al's

Art Unit: 1711

general disclosure encompasses and renders obvious to one having ordinary skill in the art the further incorporation of an electrically conductive component, for its expected additive effect.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
